JANUARY IN PARIS!
J-TERM 2016

Living Parisian Arts and Culture

Paris may be a moveable feast, but it is also an urban stage for towering cathedrals and grandiose palaces, as well as the invention of modernity and monumental revolutions in arts and culture. This course is an exploration into the complexities and contradictions of Paris and its subsequent influence on Western civilization.

Come experience Parisian arts and culture! We will investigate existing historical sites and the fine arts, understand how and why particular histories of Paris have been constructed, and examine the thematic and theoretical functions of music, art, literature, and film in constructing histories of Paris.
